Preamble

The Kalyan Singh Super-Specialty Cancer Institute is an autonomous Institute of the Government of Uttar Pradesh. It is envisioned as a state-of-the-art cancer treatment facility, and is slated to offer a complete range of clinical services for cancer patients, including end-of-life care, under one roof. It will also train doctors in various broad specialties and super-specialties; offer senior resident and post-doctoral certificate / fellowship positions; train nurses and paramedical staff; and focus on innovation and research aimed at providing cost-effective and value-based strategies for the diagnosis and management of cancer patients.

We are looking for faculty members, who besides being skilled in their respective disciplines, have a reasonable appreciation of data management and statistical inference techniques; can leverage information technology tools in their daily work; are team players; and demonstrate reasonable bi-lingual (English and Hindi) communication skills and empathy. The positions will be full time and private practice of every kind is prohibited.

The Institute is committed towards making medical care safe and in improving the most important goals of a person afflicted with cancer - of living longer and better. The treatment decisions would thus be necessarily made through multidisciplinary disease management groups or interest groups, functioning in virtual or real time, and not by individual consultants. This will be accompanied by periodic and systematic audits. These audits shall be the cornerstone of patient care activities at the Institution and will guide changes in various processes to make clinical care more effective, safe and convenient to patients. These will also be a critical parameter for employee / trainee appraisals.

The institution will encourage the faculty to engage and collaborate with civil society, other educational institutions and universities, philanthropic groups, and not-for-profit-organizations, for promoting the cause of evidence-based, comprehensive patient care with a societal perspective and relevant research.

If currently overseas, video-call(s) may be arranged for assessment of afore-stated process. We will also speak to your referees or others at your previous places of training / work.
